PROFESSIONAL SUMMARY

Second-year B.Tech Information Technology student with hands-on experience in Java backend development, MySQL database design, and REST API testing through a software engineering internship at GenIT Edge LLP. Developed backend modules and implemented SQL-based database operations while building an inventory management system. Interested in applying software development and problem-solving skills to contribute to real-world engineering projects.

EDUCATION

Andhra University College of Engineering for Women Visakhapatnam, India
Bachelor of Technology (B.Tech) – Information Technology 2024 – 2028
Academic Score: 87%
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems.

TECHNICAL SKILLS

Programming Languages: Java, Python, C
Backend Development: Java Servlets, JDBC, REST APIs
Web Development: HTML5, CSS3, Responsive Web Design
Databases: MySQL, SQL (CRUD Operations, Joins, Aggregate Functions)
Software Engineering: SDLC, Agile Development, Unit Testing
Tools & Technologies: Apache Tomcat, Postman, Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

GenIT Edge LLP Remote
Junior Software Engineer Intern Jan 2025 – Mar 2025

- Implemented 3 backend modules using Java and JDBC, enabling reliable data operations across 5+ relational tables in MySQL.
- Developed 4 responsive web pages using HTML and CSS for product and stock management workflows.
- Deployed and tested Java web applications on Apache Tomcat, diagnosing and resolving 10+ configuration and runtime issues.
- Designed and executed 20+ SQL queries to retrieve and manage relational data within the MySQL database environment.
- Validated 15+ REST API endpoints using Postman, ensuring correct data exchange between frontend and backend systems.
- Collaborated with a team of 3 developers following SDLC practices to complete assigned development tasks.

PROJECTS

Inventory Management System – Backend Web Application GitHub
Java, MySQL, JDBC, Servlets, HTML/CSS

- Architected an inventory tracking system for managing products, stock levels, and supplier information.
- Designed a normalized MySQL database schema with 5+ relational tables for efficient inventory data storage.
- Implemented backend logic using Java Servlets and JDBC to support CRUD operations for inventory management.
- Integrated SQL queries with the application layer to enable real-time product and stock updates.

ACHIEVEMENTS

- Completed Google AI 5-Day Learning Program, gaining foundational exposure to Artificial Intelligence concepts.
- Vice President, Edumoon Entrepreneurship Student Club – Selected for leadership, teamwork, and organizing student entrepreneurial initiatives.
